IBM is a leading global provider of AI services, and consulting expertise. IBM helps clients in more than 175 countries to use AI to make their businesses more profitable.

AI has the potential to play a crucial role in enhancing international trade by improving supply chain management and logistics. The use of AI can help to move goods efficiently across borders, reducing delays and lowering costs. Buyers-AI.com is a TradeDigitization.com initiative. part of a revolution in the Trade Process, which is driven by Buyers. Digitization is revolutionizing Trade. By Operating a TRADE GATEWAYS network of over 300 Digital Trade Gateways, TradeDigitization.com, an IBM partner Programme, combines Trade Digitization with the benefits of AI.

TradeDigitization.com helps buyers and sellers by integrating Buyers-AI.com into the TRADE GATEWAYS network to help buyers, and integrating Manufacturer.Trade and Marketplaces.Trade into the TRADE GATEWAYS network to help sellers, and also empower SMEs. Buyers participating in Buyers-AI.com, who require Supply Chain Planning can use predictive AI provided by IBM to align logistics and inventory planning to achieve better profitability. AI and advanced analytics for business demand planning provided by IBM which can help forecast with unparalleled accuracy. This in turn can help define Buying Forward requirements that are facilitated by Buyers-AI.com.

Buying forward involves securing goods at current prices for future delivery, thereby eliminating price increases.Forward contracts are customizable private arrangements, tailored to specific goods, quantities, and delivery dates. The Buyers-AI.com network, brings together Buyers and Manufacturers and Suppliers on a single platform, and features a Directory of Trade Gateways that features Logistics Services Providers.

Every entity receives a unique Identifier. This is based on the DNS system, which is the "Phone Book" of the Internet. This allows documents issued by entities on the network to be authenticated by being digitally signed from the branded and universally verifiable authenticated IP address of a branded site on the network.Products on the network also receives a unique Identifier based on the product GTIN which is the number in the familiar barcode. This the GTIN Token Programme, and is the world's first-ever implementation of GTIN semantics in a Trade Digitization framework. A

TradeDigitization company owns the GTIN Token Trademark. URL <https://buyers-ai.com>
